

WinRoast[®] Basic Training

Learn to Use the Best Oil Analysis Software Available

WinRoast is a state of the art oil analysis and lubrication management software package created exclusively by
The Fluid Life Corporation.

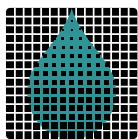

WINROAST BASIC – 1 DAY COURSE

In this course you will learn to:

- View and edit data.
- Manage units (create, edit, merge, delete).
- Setup new oil samples for baseline.
- Setup samples, including easier batch setup and non-routine tests.
- Communicate with the lab, send samples and receive results and other reports.
- Schedule automatic reports, i.e. problem samples, samples due.
- Create your own flagging rules (global and component specific).
- Print reports (results, maintenance and standard WinRoast reports).
- Edit your preferences, customize WinRoast to suit your needs.
- Create sampling schedules.
- Graph results, useful for seeing the 'whole picture' and developing flagging limits.
- Export data to other maintenance software and Excel.
- Search database for samples based on multiple criteria.
- Manage WinRoast user accounts, restrict access and authority for some users.
